Agency / Comment Deadline	Proposed Rule	Summary / Excerpts from Agencies	Additional Resources / Actions	Notes
Dept. of Interior / Fish and Wildlife Service (FWS) 08/08/2022	<p>Proposed Rule: Endangered and Threatened Wildlife and Plants; Designation of Experimental Populations</p>	<p>FWS proposes to revise regulations concerning experimental populations of endangered and threatened species by removing language generally restricting the introduction of experimental populations to only the “historical range” to allow for the introduction of populations into habitat outside of their historical range. FWS has concluded this may be increasingly necessary and appropriate if the ability of the habitat to support one or more life history stages has been reduced due to threats, such as climate change or invasive species. <i>(emphasis added)</i></p>	<p>Significant proposal to allow FWS to take into account the effects of climate change. Read more in this article.</p>	<p>Concern that proposed rule "allows a population of an ESA-listed species to be released into habitat deemed suitable for the species, while providing increased flexibility in working with nonfederal partners in managing 'take of the species. relax restrictions on 'taking' of endangered species as the rule would require cooperation with 'non federal' partners."</p>

<p>Dept. of Interior / Fish and Wildlife Service (FWS) 08/08/2022</p>	<p>Proposed Rule: 2022-2023 Station-Specific Hunting and Sport Fishing Regulations</p>	<p>1. FWS proposes to open, for the first time, two National Wildlife Refuges (NWRs) currently closed to hunting and sport fishing; and to open or expand hunting or sport fishing at 17 other NWRs for the 2022-2023 season. 2. The best available science indicates lead ammunition and tackle may have negative impacts on both wildlife and human health. While the Service continues to evaluate the future of lead use in hunting and fishing on Service lands and waters, this rulemaking provides a measured approach in not adding to the use of lead on refuge lands.</p>	<p>AFA has advocated to end the use of lead ammunition at past Michigan NRC meetings. Read our letter from Feb. 2020.</p>	
<p>Dept. of Interior / Fish and Wildlife Service (FWS) 08/22/2022</p>	<p>Notice: Endangered and Threatened Wildlife and Plants; Establishment of a Nonessential Experimental Population of the Gray Wolf in the State of Colorado; Environmental Impact Statement</p>	<p>FWS intends to prepare an environmental impact statement (EIS) pursuant to the National Environmental Policy Act to evaluate the potential environmental impacts of issuing a proposed rule requested by the State of Colorado for its reintroduction and management of the gray wolf. The State has requested that the Service designate an experimental population under section 10(j) of the ESA. FWS is considering promulgating a rule to address components of the gray wolf restoration and management plan being developed by Colorado. The proposed rule would set forth regulations to manage reintroduced gray wolves in Colorado and potentially adjoining States to reduce potential impacts to stakeholders while ensuring reintroduction and management of wolves is consistent with Federal regulations.</p>	<p>Colorado voters approved a ballot measure in 2020 to reintroduce gray wolves into the state by the end of 2023. The Colorado Parks and Wildlife's plan is under consideration by FWS. Environmental and wildlife groups have criticized the plan, saying it favors ranchers and hunters, and has developed its own plan for wolf recovery.</p>	<p>Read the alternate plan proposed by Wild Earth Guardians</p>

<p>Dept. of Commerce / National Oceanic and Atmospheric Administration / National Marine Fisheries Service (NMFS) 09/12/2022</p>	<p>Proposed Rule: Listing Endangered or Threatened Species; 90-Day Finding on a Petition To Revise the Critical Habitat Designation for the North Pacific Right Whale</p>	<p>NMFS announces a finding on a petition to revise the critical habitat designation for the North Pacific right whale. In April 2008, NMFS issued a final rule designating approximately 1,175 square miles) and approximately s (~35,460 square miles of critical habitat in the Gulf of Alaska and the Southeast Bering Sea, respectively. NMFS finds that the petition presents substantial scientific information indicating the petitioned action may be warranted.</p>	<p>Proposed rule in response to a March 2022 petition filed by two environmental organizations seeking to expand critical habitat for these highly endangered whales. Only an estimated 30 individuals remain in the wild. More information here.</p>	<p>Another species, the North Atlantic right whale is critically endangered. NOAA will publish a proposed rule on August 1, 2022 to reduce vessel speeds to further reduce mortalities and serious injuries to right whales from vessel collisions, a leading cause of the species' decline.</p>
<p>Dept. of Commerce / National Oceanic and Atmospheric Administration / National Ocean Service / Office of National Marine Sanctuaries (ONMS) 10/26/2022</p>	<p>Proposed Rule: Florida Keys National Marine Sanctuary Management Review: Blueprint for Restoration</p>	<p>The sanctuary currently protects 3,800 square miles with more than 6,000 species of marine life within the boundaries. The proposed rule would expand the boundary of the sanctuary, and update both sanctuary-wide and zone-specific regulations. The proposed rule is necessary to improve the condition of resources in the Florida Keys through a series of regulatory measures designed to reduce threats and, where appropriate, restore coral reefs, seagrasses, and other important habitats.</p>		

<p>Dept. of Interior / Fish and Wildlife Service (FWS) N/A</p>	<p>Proposed Rule: Endangered and Threatened Wildlife and Plants; 90-Day Finding for Three Petitions To List the Yellowstone Bison</p>	<p>FWS announces that reviewed three petitions to add a distinct population segment of the Plains bison in and around Yellowstone National Park to the ESA. It concluded they present substantial information that the actions may be warranted. FWS plans to initiate a status review to determine whether the petitioned actions are warranted. Based on the status review, FWS will issue a 12-month finding.</p>	<p>FWS is re-considering earlier decisions denying listing as a result of a Jan. 2022 court order. The petitions for listing were initially filed in 2014. A major concern is habitat loss. Among the agency's management activities is a "bison removal plan" which includes "culling" of some Yellowstone bison. Additional information here.</p>	<p>More information here.</p>
<p>Dept. of Interior / Fish and Wildlife Service (FWS) N/A (Final Rule, effective August 1, 2022)</p>	<p>Final Rule: Endangered and Threatened Wildlife and Plants; Revision to the Nonessential Experimental Population of the Mexican Wolf</p>	<p>The final rule removes the cap on population, sets forth a new objective for genetic diversification, and temporarily restricts three provisions allowing "take." The Rule continues the population as "nonessential".</p>	<p>Wolf advocacy groups whose lawsuits challenging the 2015 rule, led USFWS to promulgate the new rule, have criticized it and say they will sue. They argue, inter alia, that the "nonessential" designation is flawed and rule ignores best available science, the prohibitions against killing are temporary, and the rule does not address poaching.</p>	<p>More information about the criticisms is available here</p>
